Introduction of pay and display parking charges in Weston-super-Mare

Explanatory notes

The Council proposes to introduce on-street pay and display parking charges in central Weston-super-Mare. The Designation Order is required to specify how the pay and display scheme will work and where the charges will apply.

To facilitate the introduction of the pay and display scheme the existing parking restrictions must be amended. For this reason the proposal is being advertised together with the changes to the existing parking restrictions, although they are separate proposals and any objections should be made in relation to a specific Order.

The schedule to the proposed Order consists of a series of plans marked ‘Proposed’. The drawing reference numbers are indexed on a further drawing included.

Also included is a drawing showing more generally the areas of Weston-super-Mare affected by the proposals.

The various parking permits which will be available to residents, tradesmen and health visitors are defined by a separate document. A draft of this document is included for information only.

Note: These notes are for information only and do not form part of the consultation.
